

# Care You Can Count On

## The Only Designated Level III NICU in the Area

When it comes to choosing a hospital to deliver your baby, you want the peace of mind of knowing you're in the best possible hands. ORMC is the only hospital in the Permian Basin who has received the NICU Level III Designation by the Texas Department of State Health Services.

In addition, ORMC has been named a Five-Star Women's Care Recipient for Vaginal Delivery and C-Section Delivery for 3 years in a row by Healthgrades. This recognition reflects our patients' excellent health outcomes, with lower rates of complications than at many other hospitals.

We've been passionate about taking care of both Moms and their babies for more than 40 years. We love what we do, and we think it shows.
