Patient Information

Metformin Administration (Post Radiographic Contrast Media)

Physician's Orders

Physician: Orders activated by MD signature; cross through any order you do not want to initiate.

Inpatient Orders:

1. Hold oral hyperglycemic medications that contain Metformin (see listing below) for the next 48 hours.
Actoplus Fortamet Glumetza Diamet Riomet
Avandamet Glucophage Metaglip Glucovance Metfogamma
2. After 48 hours obtain a serum creatinine.
3. Obtain the lab results:
 - If the serum creatinine level is within the normal range, restart this medication.
 - If the serum creatinine level is elevated above the normal range, notify the attending physician for further instructions regarding the administration of this medication.
4. If the patient is discharged from the hospital prior to restarting this medication, notify the attending physician to order follow-up care as indicated in the "Outpatient Orders." (see below)
