

We'll Keep You Healthy No Matter Where You Travel

Traveling abroad? Visit the International Travelers' Clinic
at Nashoba Valley Medical Center

Jennifer Watson, LPN, gives a vaccine to a patient who will soon be traveling.

“Over 600,000 people continue to lose their lives to malaria each year, and there is no vaccination for that disease. A traveler must take pills before, during and after the trip to an area where malaria is prevalent. This is one example of how an expert in the field of travel medicine can help protect travelers from infectious disease.”

Robert Voight, MD, medical director of the Occupational Health and International Travelers' Clinic at Nashoba Valley Medical Center

If you are traveling abroad, whether to China on business, Africa for charity-related work or India for pleasure, consider consulting the International Travelers' Clinic at Nashoba Valley Medical Center, which provides pre-travel evaluation, counseling and immunizations for international travelers.

The specialty of travel medicine was developed to prepare and protect the increasing number of people who travel, for business or pleasure, to those international destinations that are still considered infectious disease risk areas.

Robert Voight, MD, medical director of the Occupational Health and International Travelers' Clinic at Nashoba Valley Medical Center, has provided evaluation and counseling to international travelers since 1987. Voight is board certified in internal medicine and occupational medicine, and has been awarded the Certificate of

Knowledge in Travel Medicine by the International Society of Traveler Medicine.

“Over 600,000 people continue to lose their lives to malaria each year, and there is no vaccination for that disease. A traveler must take pills before, during and after the trip to an area where malaria is prevalent,” says Voight. “This is one example of how an expert in the field of travel medicine can help protect travelers from infectious disease.”

Available immunizations include yellow fever, typhoid, hepatitis A and B, polio, rabies, tetanus, meningitis, Japanese encephalitis, measles, mumps, German measles, chicken pox, and influenza.

The clinic also provides routine vaccinations to patients as long as they have a prescription, including MMR, varicella, Pneumovax, Zostervax, Gardasil, meningitis, hepatitis A, hepatitis B, flu, Japanese encephalitis,

polio, typhoid, yellow fever, rabies, Td and Tdap, as well as TB testing with either the Mantoux test or the T-Spot.

The International Travelers' Clinic at Nashoba Valley Medical Center can help you prepare for your business travels, or that around-the-world vacation of a lifetime.
