

# DON'T LET THE SUN GET UNDER YOUR SKIN

Norwood Hospital's skin cancer team includes Dermatologists, Medical Oncologists and Surgeons, working collaboratively to screen, diagnose, treat, and provide on-going support to patients. If you haven't had a recent skin cancer or mole screening, ask your physician about scheduling one.

## REMEMBER ABCDE WHEN EXAMINING MOLES:

- **ASYMMETRY:** One half of the mole does not match the other half
- **BORDER:** The border or edges of the mole are ragged, blurred, or irregular
- **COLOR:** The mole has different colors or it has shades of tan, brown, black, blue, white, or red
- **DIAMETER:** The diameter of the mole is larger than the eraser of a pencil
- **EVOLVING:** The mole appears different from others and/or has changed in size, color, or shape

Let your physician know if you have a mole(s) fitting any of these descriptions
