

# Pediatric Rehabilitation

## Individual Care for the Whole Person

For more than two decades, Saint Anne's Hospital has brought experienced, board-certified pediatric specialists to the area to offer children the best in pediatric

care. That commitment to excellence and dedication is apparent in our pediatric rehabilitation program.

Working closely with you and your child's primary care pediatrician or specialist, our therapists develop a rehab plan individualized for your child's needs and keep your child's physician updated as to progress and treatment. Many years of pediatric expertise are shared among our staff of interdisciplinary specialists.

The specially trained staff consists of occupational therapists, physical therapists, and speech/language pathologists whose certifications also include early intervention, special education, sensory integration (Praxis Test), and the Wilbarger Protocol, an approach to the treatment of sensory defensiveness.

Serving children from birth to 18 years of age, Saint Anne's Pediatric Rehabilitation Program includes:

- Physical therapy
- Occupational therapy
- Speech-language therapy
- Sensory integrative therapy
- Neurodevelopmental treatment-based programs
- Craniosacral therapy
- Feeding/swallowing therapy

In addition, we provide comprehensive evaluations, treatments, and school consultation when needed.

Our complete home programming and parental education are essential components that give you peace of mind and confidence. As a part of The Fernandes Center for Children & Families, referrals are readily made to other clinicians as needed. All interdisciplinary services provided within the Center are coordinated.

In addition to rehabilitation, other services provided and coordinated by The Fernandes Center for Children & Families include:

- Autism Clinic
- Cardiology
- Development pediatrics
- Endocrinology
- Feeding Team
- Gastroenterology
- Genetics
- Growth & Nutrition
- Nursing
- Urology
- Behavioral health (including child and adolescent psychiatry, child psychology, neuropsychology, and clinical social work)
